IAP

International Association
of Pancreatology

Founded 1984

International Association of Pancreatology

Officers of the Association

Ashok Saluja, President
Masao Tanaka, Past-President
P. Levy, President-Elect
Jeremy Wilson, Secretary
Carlos Fernandez-del-Castillo, Treasurer
W. Kimura, Co-Treasurer

Objectives

1. To promote and encourage the advancement and exchange of knowledge respecting the normal and diseased exocrine and endocrine pancreas by means of regular joint meetings with the American Pancreatic Association (APA), the European Pancreatic Club (EPC) and the Japanese Pancreatic Society (JPS) every two years.
2. To advance and encourage studies in basic and clinical research in pancreatology by the joint meetings, as well as by consensus meetings and the publication of suggested guidelines.
3. To promote public interest in pancreatology.
4. To make known the objectives and activities of the association by the publication of its activities in all media and the regular publication of its journal **Pancreatology**.

Pancreatology

Pancreatology is the official journal of the IAP. Dedicated to the understanding and treatment of pancreatic disease, this multidisciplinary periodical is concerned with the endocrine and exocrine pancreas in health and disease, including endocrine-exocrine interactions. New treatment modalities are presented alongside more basic information relating to the etiology and progression of pancreatic disease and abnormal pancreatic function. Findings from the fields of gastroenterology, oncology, surgery, pharmacology, cell and molecular biology as well as endocrinology, immunology, and epidemiology are brought together to present an integral picture. Featuring, among other things, original articles, reviews and case reports, **Pancreatology** emphasizes not only clinical aspects, but also offers valuable information for the researcher. Furthermore, in its function as official journal, **Pancreatology** will regularly feature reports from IAP Council Meetings, information about future IAP meetings as well as general society news.
